Ultrasound of abdomen

Liver is normal in size, shape, position and echotexture. There is no dilatation of the intrahepatic biliary radicles seen. The hepatic veins are normal. No focal lesion is seen. CBD and portal vein are normal in caliber

Gall bladder is contracted. (patient has taken meals before USG). No calculus is seen in GB lumen.

Pancreas is normal in size, shape, position and echotexture.
Spleen is normal in shape and echotexture. The splenic vein is normal.

The left kidney is normal in size (=77mm x 35mm), in shape, position and echotexture. The cortico - medullary differentiation is maintained. The pelvicalyceal system on left side is non-distended.

The right kidney is small sized (47mm x 17mm), otherwise normal in shape, position and echotexture. The cortico - medullary differentiation is maintained. The pelvicalyceal system on right side is non-distended.

There is no free fluid / lymphadenopathy seen. The Aorta and IVC are normal.

Urinary bladder is normal in shape and contour. There is no mucosal irregularity seen. **A large vesical calculus of about 23mm size is seen in the lumen of urinary bladder.**

Advice : Clinical & pathological correlation/X-Ray Abdomen (KUB):AP View.
