Name *Himanshu Shalunq.* Weight

Age 13 years 3 Height:

Mast. Himanshu, is a k1c10 B cell Acute lymphoblastic leukemia commenced on CO6 High Risk protocol chemotherapy from 27/8/2022. He has completed intensive phase of his chemotherapy. His chemotherapy course has been stormy requiring multiple admissions due to febrile neutropenia. He still need to undergo 2 years of maintenance chemotherapy. However financial condition of his father is not very good. His 2 years of Maintenance chemotherapy will also include periodical Intrathecal (lumbar puncture) chemotherapy.
